LUXURY HOME AUTOMATION

SMART HOME SOLUTIONS
TAILORED TO YOUR LIFESTYLE

THE DOMOTICS

Make your house always feel like the most welcoming home with the help of automation! Imagine waking up to the smell of fresh hot coffee, your favorite morning music playing from the main room, your bedroom curtains opened 'just so' to ease you into the day...

Or coming home after a long day... You simply press the 'welcome home' button and your home welcomes you by deactivating the alarm system, adjusting the temperature, drawing the curtains, adjusting lighting, and putting on your favorite music.

Whether you manually activate a program or let it all run on automated timers, home automation lets you maintain the perfect atmosphere at any time, day or night.

ABOUT US

HOME AUTOMATION AT A
WHOLE NEW LEVEL

Who we are

WE MAKE HOME SIMPLE TO USE

The Domotics brings you new-age technological expertise that takes home automation to a whole new level.

Since our inception in 1998, we have constantly strived to deliver secure, custom-built and cost-effective solutions that has today, made us the preferred choice in Building Management Systems.

As the channel partner for Luxury brands in South India, we leverage its niche offerings and bring the extensive array of one-stop solutions to you. With the combined synergies of The Domotics and Control systems, the power of automation truly lies in your hands!

Plan & Process

HOME AUTOMATION PROJECT MANAGEMENT

Project Management is a critical but often overlooked service in many home theater and automation projects. Not so at our company.

Every project is assigned to a project manager. Our project managers plan and coordinate each phase of the project and interface between all parties, from the builder to the supply house to the customer. They also ensure that outstanding attention to details followed on each and every project, no matter the size.

Our Support

EXCELLENT CARE & CUSTOMER SUPPORT

We are all about long term client relationships and providing exceptional support for its products and services.

With each new project we enter into a relationship that typically lasts many years. Our extended maintenance programs provide ongoing and preventative maintenance, system upgrades, and consultation on new innovations. Combined, these services serve to ensure that each customer's system continues to function reliably and the all the benefits can be enjoyed to the full.

LIGHTING CONTROL

Enhance your home's natural beauty inside and out with stylish lighting all controlled from one location with a lighting control system. Lighting control is only as far as your finger tips when you want to dim the lights for that dinner party and illuminate the porch for arriving guests.

Lighting control is also helpful to create a safer environment at home. When no one is home, program your lights to say otherwise by turning on and off at various times.

CLIMATE & SHADE CONTROL

Intuitive climate control ensures the perfect temperature for every season. Whether it is cold or hot outside, your smart home will adjust to ensure complete comfort and energy efficiency.

Motorized shade control can transform a room into a remarkable space. Designer fabrics, elegant hardware, and top-notch technology ensures you have the perfect shading solution for any room or desired environment.

WHOLE HOUSE AUDIO

Whole house audio systems, allow you to listen to various music selections in different rooms of your home all controlled from one central location. The music can even be extended into your backyard! In-wall or in-ceiling speakers are added to the selected rooms and weather-appropriate speakers go outside.

The days of blasting the music in one room to fill the entire house are over. With a multi-source system you don't even have to listen to the same audio throughout the entire house –select a different source for each room to set the mood at your next party.

SAFETY & SECURITY

Your home is one place where you and your family should feel safe and with an integrated security system it's as simple as pressing a few buttons to secure what's most important to you. Security options range from house alarm systems which are set off by sensors and detectors to camera systems that include night vision cameras for that homeowner seeking maximum-security coverage.

Integrated security means that you get more than an alarm going off or a call to a designated person –it means that we can program the system to contact your cell phone and turn on the lights in perimeters and close the emergency shutters. Now, that's peace of mind.

LIVING ROOM CINEMA

Your home theater doesn't have to be just a theater. With a little thoughtful décor, it can easily double as a living room, enabling you to use the space in multiple ways.

Stock up on cozy seating you can easily rearrange, and snag a TV that's big enough for movie night. You can use curtains to flexibly adjust your lighting set-up, and you can use sleek décor to bring your space together—without disrupting your viewing experience.

A Distinctive Concept

Our glass speakers blend into your interior and give it a resolutely unique cachet. Their transparency allows them to fit into any style with timeless elegance.

HOME CINEMA

Bring the sights, sounds and excitement of your favorite movies to life when you have the right home theater system.

A movie theater may not be a necessity in any home, but it's certainly a delight. If your family gatherings revolve around movie night—or if you love the experience of snuggling up with a great film—a home theater may be worth the investment.

Sure, it can be hard to find a space suitable for movie viewing. But the truth is, home theaters can live just about anywhere in your home. With a little imagination, you can turn your basement, attic, or living room into a cozy movie-watching nook. And you can deck it out as much or as little as you want to.

OUTDOOR ENTERTAINMENT

Outdoor living spaces have become an extension to our homes and there's now a wide range of technology solutions built to withstand the elements without compromising performance.

Add music, video, and a lighting control system to make the perfect entertaining space for family and friends or create a great spot for a much-needed personal respite from the everyday. Enjoy superior sound from speakers that blend into your beautiful landscape and a dispersed bass from an in-ground Sub-woofer.

And watch your favorite sports team or movie on a flat screen TV that not only weathers the storm and the sun, but minimizes glare for quality viewing even on a bright day. When the sun goes down, set your outdoor lights to create ambiance either automatically or with a single press of a button of your outdoor entertainment control system.

GARDENING AUTOMATION

Garden refreshes your mind, body and soul. Having a beautiful Garden is the result of planning and maintenance.

Fantastic evening on the terrace

A simple click of the Button on your way to the garden to turn on a charming lighting and play favorite playlist will certainly make the evening more pleasurable and transform any garden meeting into a unique part of your smart home life.

Weather live response

Scheduled automatic garden watering turns out to be an extremely convenient solution. In case the weather becomes unpredictable, it is worth equipping the flowerbeds with humidity sensors. Prevent unnecessary plant flooding and water consumption by a simple information about the optimally hydrated soil from the sensors.

Magical evening

Wandering around the garden in the evening, especially if it's a big space we don't need to turn on the lights in the entire garden. When Motion Sensor detects motion, the light switches on in the places where there are people. Thanks to that solution you can admire your garden after dark and don't worry about your lighting bills.

SWIMMING POOL AUTOMATION

Pool Control at the touch of A Wrinkly finger

Lights, Music ... Let's Swim!

We can control the outdoor lights, the pool lights, Pool music and pool Jets, even the pool waterfall. But that's not all! The pool's filtration and heating systems are also all integrated, giving you full voice control over every deep-end feature you need.

If having a pool, let it be one you can jump in anytime, no matter the actual air temperature. Water heating system configured with air temperature sensor, allows you to use the pool every time of year and day. Feel the soothing chill in the summer and pleasantly warm water during spring and autumn.

Weatherproof speakers, Outdoor TV and Integrated to Home Automation -this is truly a tech fanatics home. Swim with full surround sound audio, well, add an underwater speaker and let the music continue even when you plunge in, easily use an iPad to control everything, and top it all off with outdoor movies. We're jealous.

MOTORIZED MOUNTS

Motorized TV & Cabinet Lifts For Pop-up, Drop-down Or Flip-down

If you don't like your TV screen or monitor dominating your room décor, we have a solution for you - buy a TV lift mechanism which will help tidy your space and make it look less crowded. The trend for decluttering has grown especially in smaller living spaces. Residents are investing in modular furniture to incorporate in their small space. With our range of pop-up and drop-down TV lifts you can easily conceal your TV set in a cabinet or within the ceiling or walls of your home.

TV lifts also give you the flexibility to be creative. Many owners use TV motorized lifts to enhance their outdoor space, from placing a Television in their backyard or patio to installing one by the swimming pool. People have found many ways to up level their entertainment aesthetics.

MOTORISED PORCHES - AN EXTRA LIVING ROOM

Transform your porch in an outdoor room[®]

Your porch, deck or patio can create an extra dimension for your home's exterior like no other feature, especially when it is transformed in an Outdoor Room. It is often the first thing people notice when they see your house.

These welcoming open leisure spaces have become full extensions of our home, expanding residential living space, adding enjoyment and blurring the lines between indoors and outdoors. Outdoor Rooms often serve more multi-functional purposes for more family members than any other room of a home. A porch that is transformed in an Outdoor Room can act as a an outdoor kitchen, a fire place, a TV room, a dining room or whatever other function suits your lifestyle. By adding heaters, retractable Zipshade screens or sliding glass walls, a customized pergola can be suitable for any season, from sunbelt to snowbelt.

Nowadays, there are many possibilities to upgrade your porch. Transform your patio or deck by adding a bespoke pergola attached to your house. You could also integrate a louvered roof in an existing structure or even integrate Zipshade sun shades which are perfect for more privacy, sun shelter, wind & rain protection, light control and bug protection.

Don't have a porch at all? Add a freestanding pergola in your backyard to create the perfect outdoor space.

DESIGNER KEYPADS

Transform the ordinary into the extraordinary with a single touch

Welcome to the world where intelligent functionality meets high end design. A world full of tiny yet crucial objects that lifts up your interior to a next level. A world of jiving textures that appeal to your most tactile senses.

One of the most compelling features of home automation is the ability to press one button that spawns multiple actions. Outside of the archetypal lighting control, the keypad presents many advantages that a homeowner may not be aware of. Once a homeowner knows exactly what they want their scene to do, it's fairly easy for to control from a Intelligent Keypad.

And while it may seem like a minor convenience in thought, once lived with, it's quick to realize how much value it really adds in the home. For instance, pressing one button as you leave the house that turns off every device, every light, locks every door, and arms the alarm.
